

## STEM Outreach

Amaro Group is proud to support future talent through ongoing STEM outreach efforts. Recently, members of our team including Sanna Qureshi, Project Manager and apprentices Eva Callaghan and Laura Howes visited Walthamstow Academy School to deliver an engaging talk on careers in railway engineering and infrastructure, offering students insight into real-world applications of science, technology, engineering, and maths. By sharing our experiences and answering questions, we sought to spark curiosity, raise aspirations, and highlight the diverse opportunities available within the rail industry, encouraging the next generation to consider a rewarding career in railway engineering.
